

OAKLEAF
STOVES

The 2024 Collection

Welcome

A fireplace has the ability to transform any room, becoming a natural focal point. The Oakleaf Stoves Collection presents a modern range of multifuel stoves and accessories, that combines investment in design with quality materials and expert craftsmanship.

By embracing classical design themes and infusing this with contemporary design principles, we have created a variety of beautifully crafted stoves that will make a statement of enduring elegance in any room.

The Oakleaf Stoves Collection are Ecodesign Ready stoves and extremely efficient glass fronted.

ECO DESIGN STOVES

Lowering emissions to an absolute minimum, our collection is designed to make them some of today's cleanest burning fires.

All of our stoves have been verified as meeting the stringent air quality and efficiency standards of the Ecodesign directive, and can be found displaying the Ecodesign stoves label.

BEAUTY & WARMTH

With a stunning large portrait viewing window the Oakleaf Collection gives an amazing flame and warming glow to any room.

INSTALLATION

Your Oakleaf Collection Stove is made up of a number of different components and it is important to ensure that your installer has the necessary qualifications and experience to fit all the components of a wood burning / multifuel stove.

All Oakleaf Collection Stoves are supplied with detailed, comprehensive installation and user instructions. All installations must be in accordance with the manufacturer's instructions, current building regulations and British standards.

The installation should only be carried out by qualified competent persons. For solid fuel, a fully registered engineer.

Failure to comply with these requirements may render the appliance unsafe in the first instance, reduce the efficiency and

serviceability of your appliance and ultimately invalidate the warranty.

All installers in order to satisfy the terms and conditions of our warranty, must be registered with the appropriate regulating bodies as deemed by Oakleaf Stoves. For solid fuel installations all installers must be registered with a regulating body.

It is important that you retain all documentation following the installation as this will be required in order to activate the warranty if needed.
